Enes Büke, 4AHITN 2020/21

This research paper deals with questions about eBooks and e-readers. At the beginning, the two terms are explained, then advantages and disadvantages are listed, further on the history or the beginnings of eBooks and e-readers are written. After that, the technical details and dangers are explained, and finally, a few applications are listed that allow a cell phone to read eBooks.

The information that is in this research paper is information from the Internet.

The research questions that appear in this research paper are questions that are also among the most frequently asked questions.

The results explain that eBook is a digital form of a printed book, and that an e-reader is needed to read the digital book. There are differences in buying an eBook compared to buying a printed book. When a printed book is purchased, the customer becomes the owner of the book. Thus, the customer is allowed to do anything he wants with the book, but with eBook it is different. The buyer of eBook gets a license from the company, which prohibits lending or selling.

The results also show that an e-reader, unlike cell phones, have little impact on our health. In addition, we find that despite many advantages of Books or e-readers, people like normal books more.
